

The screenshot shows the Splunk Search interface. At the top, there's a search bar with the query: `source="app.log" host="LAPTOP-40B0D91T" sourcetype="app-log"`. Below the search bar, it indicates 93 events. The results are displayed in a table with columns for Time and Event. The first event is a warning from the DefaultHandlerExceptionResolver. The second event is an info message from the DispatcherServlet. The third event is an info message from the DispatcherServlet. The interface includes a search bar, a results table, and a sidebar with navigation options.

The screenshot displays the Splunk Search interface. At the top, the search bar contains the query: `source="app.log" host="LAPTOP-40B0D91T" sourcetype="app-log"`. Below the search bar, the results are shown in a table format. The table has columns for 'Time' and 'Event'. The search results show four log entries related to the initialization and startup of a web application.
